PROFESSIONAL SUMMARY

QA Automation and Web Development professional with hands-on experience in Manual Testing, Functional Testing, API Validation, Regression Testing and Playwright Automation. Experienced in designing test scenarios, identifying defects, validating user workflows and automating critical business flows for web applications. Strong understanding of SDLC, STLC and software quality practices with a development background that enables effective collaboration between testing and engineering teams.

SKILLS

Testing: Manual, Functional, Regression, Smoke, API, Mobile Testing
Database: SQL, MySQL
Concepts: SDLC, STLC, Bug Life Cycle, Test Case Design, Exploratory Testing
Automation: Playwright, Page Object Model (POM)
Tools: Excel, Postman, Google Lighthouse, GitHub, Git,

EXPERIENCE

Chipin Corp Nov 2025 - July 2026
Web Developer (Quality-Focused)

- Developed and maintained production websites that delivered a smooth user experience, responsive design, and uniform UI performance across all devices.
- Built and Validate UI components, forms and interactive features, manually tested different user scenarios and edge cases during development.
- Improved application loading by reducing excessive JS/CSS load, improved asset management and fixed layout shifts resulting in faster load times and more fluid rendering.
- Audited performance and accessibility with Google Lighthouse, and changed structure, asset loading and best practices.
- Developed and tested a suite of browser based tools, covering input validation, edge cases and cross browser behaviour.
- Improved accessibility and responsive design using semantic HTML and proper use of alt attributes and validated layouts on mobile, tablet and desktop.

Sheryians Coding School May 2025 - Oct 2025
Full Stack Developer Intern Bhopal

- Developed and worked on MERN stack Applications, implemented features and functional correctness during development cycles.
- Manually tested user flows, API integrations and UI components across a range of scenarios to verify application behaviour.
- Developed AI-based features, tested results with multiple inputs for consistency and edge case behavior.
- Developed and tested new features, fixed bugs and optimized code leading to better stability of the application.

PROJECTS

VELOR E-Commerce QA Automation Suite | ***Playwright, JavaScript, React, Redux Toolkit*** 2026

- Performed end-to-end testing across 7+ core modules including Authentication, Search, Wishlist, Cart, Profile, Product Details, and Checkout.
- Developed and executed 75+ Playwright automated test cases covering positive, negative, validation, and edge-case user flows.
- Automated critical business workflows and performed repeated regression testing to validate application stability after changes.
- Applied locators, assertions, reusable utilities, and Page Object Model concepts to improve automation maintainability.

AYUVYA Mobile App QA Assignment | ***Manual Testing, Mobile Testing, Bug Reporting*** 2026

- Performed manual testing of the mobile application's onboarding and login flow, covering OTP authentication, user profile setup, plan selection, dashboard, chat, shopping, and account flows.
- Created and executed test cases covering functional, validation, negative, UI/UX, and exploratory testing scenarios.
- Identified usability and functional issues during exploratory testing, including navigation behavior, checkout flow, plan-page redirection, and back-navigation issues.
- Documented test scenarios, expected results, actual results, and observed issues in an Excel-based QA test report.

IT Services Dubai | ***Full Website Development & Quality Optimization*** 2026

- Developed a complete business website with structured UI, responsive layouts, navigation, and user-focused page flows.
- Performed cross-device and cross-browser testing to identify layout inconsistencies and responsiveness issues across mobile, tablet, and desktop.
- Improved page loading performance by optimizing CSS, JavaScript, and asset delivery, and validated changes using Google Lighthouse.
- Identified and resolved UI and functional issues during development and re-tested changes to verify application stability.

EDUCATION

Udemy (Online) 2026
Playwright Automation Testing
- Building UI automation scripts using Playwright, locators, assertions, Page Object Model, and end-to-end test execution.

Sheryians Coding School 2025
Full Stack Web Development Bhopal
- Worked on building projects and testing applications at the application level with a focus on JavaScript, REST APIs, and MERN stack development.

IGNOU 2024
Bachelor of Arts (BA) New Delhi
- CGPA: 7.5

ADDITIONAL

Certification : Playwright Automation Testing – Udemy
Languages: English, Hindi
Achievement: International Silver Medalist – Martial Arts
Interests: Public Speaking, Entrepreneurship
